INSULATING COMPOSITION

4987

HOS Heaters on Steel
COS Circuits on Steel
TFOS Thick Film on Steel

Cadmium, Lead, and Nickel-free

ESL 4987 is a dielectric composition designed to insulate unabraded, unoxidized, ferritic steels. ESL 4987 is non-porous and its TCE closely matches that of BS970/1449 Type 430-S17 or AISI Type 430 stainless steel. Three separately fired layers of 4987, having a total minimum thickness of 80 micrometers, provide excellent breakdown voltage between top conductive prints and the stainless steel base. It is essential that the stainless steel is only handled using protective gloves at all times and that all printing is carried out in clean room conditions. ESL 29XXX-C resistors are recommended for use as the heating elements with 9695 (Pd/Ag) and 9501-CH (Pt/Ag) terminations. ESL 4987 is recommended as an 850°C overglaze. These materials are also useful in other TFOS Thick Film on Steel applications.

PASTE DATA

RHEOLOGY:
Thixotropic, screen printable paste

VISCOITY:
Brookfield RVT, ABZ Spindle, 10 rpm, 25.5±0.5°C
120±20 Pa-s

COLOR:
Dark blue

SHELF LIFE: (20-25°C)
6 months

PROCESSING

SCREEN MESH/EMULSION:
165/0.0 μm

LEVELING TIME:
5-10 minutes

DRYING TIME AT 125°C:(Depending upon substrate volume)
> 15 minutes

4987 0308-A
FIRING TEMPERATURE RANGE: 850°C-930°C
Optimum: 850°C
Time at peak: 10 minutes

RATE OF ASCENT/DESCENT: 50°C-60°C/minute

SUBSTRATE FOR CALIBRATION: Unabraded, unoxidized BS970/1449 Type 430-S17 stainless steel 122.5 mm diameter x 1.2 mm

THINNER: ESL 401

TYPICAL PROPERTIES (BS970/1449 Type 430-S17 stainless steel)

FIRED THICKNESS: (At least 3 layers between 9695 and stainless steel, measured using an Elcometer 345 thickness gauge) > 80 µm

APPROXIMATE COVERAGE: (80 µm thickness) 40 cm²/g

BREAKDOWN VOLTAGE: (Measured on an 88 mm diameter 9695 print on 108 mm diameter area of dielectric at 25°C in air, using a standard Clare Flash Tester) >1800 VAC

INSULATION RESISTANCE: (Measured on an 88 mm diameter 9695 print on a 108 mm diameter area of dielectric using 500 VDC at 25°C in air) > 10⁹ Ω

A wide range of ESL materials are compatible with 4987 permitting the fabrication of other COS Circuits on Steel.

CAUTION: Proper industrial safety precautions should be exercised in using these products. Use with adequate ventilation. Avoid prolonged contact with skin or inhalation of any vapors emitted during use or heating of these compositions. The use of safety eye goggles, gloves or hand protection creams is recommended. Wash hands or skin thoroughly with soap and water after using these products. Do not eat or smoke in areas where these materials are used. Refer to appropriate MSDS sheet.

DISCLAIMER: The product information and recommendations contained herein are based on data obtained by tests we believe to be accurate, but the accuracy and completeness thereof is not guaranteed. No warranty is expressed or implied regarding the accuracy of these data, the results obtained from the use hereof, or that any such use will not infringe any patent. Electro-Science assumes no liability for any injury, loss, or damage, direct or consequential arising out of its use by others. This information is furnished upon the condition that the person receiving it shall make their own tests to determine the suitability thereof for their particular use, before using it. User assumes all risk and liability whatsoever in connection with their intended use. Electro-Science’s only obligation shall be to replace such quantity of the product proved defective.
