### **Conflict Metals:**

ESL is aware of the concerns surrounding the possible use of conflict metals in electronic products. It is ESL's corporate policy not to use metals mined in conflict areas, primarily the Eastern region of the Democratic Republic of Congo. We believe that our policies, sourcing strategies and the integrity of our metal suppliers make it highly unlikely that any metals processed by ESL originate in a conflict region.

While it is impossible to know with 100 percent certainty the origin of all the materials processed by our suppliers, we believe that the chances are remote that conflict metals are being processed. All of our metal suppliers are highly professional with impeccable reputations in the metal industry and have assured us that they have taken appropriate measures to comply.
